Wed, Nov 7, 2018 at 8:21

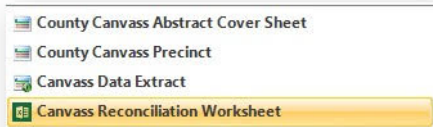

Good Morning,

Thanks to everyone for your hard work and dedication yesterday. You did a fantastic job with your election reporting tasks last night. We all had several things thrown at us at the last minute with no time to plan, much less prepare, but you all pulled it off. We would say congratulations are in order, but you truly deserve better than that. You deserve our praise. And you have our respect and admiration. Thank you.

From Brooks and Team

Now . . . here are a few updates as we begin our post-election tasks:

1. If you did not upload your Unity block style canvass report last night, please do so at this time. Load the report here: [\CountyUploads_SBE\2018\20181106_GeneralElection Night](#)
2. The [sample precinct selection](#) will take place at 10 am this morning. You were sent a link yesterday.
3. Please begin entering your voter history. Remember, you may use the Canvass Reconciliation Worksheet to begin helping you balance your voter history vs. ballots cast.

4. Use the attached **Recount Checker** to help you determine if any contest is within the margin of a recount.
5. You should also enter your provisional data as soon as possible. We ask that as you conduct your provisional research, go ahead and capture the potential disposition. If possible, avoid using *pending* unless you are truly uncertain as to the potential disposition of the provisionals.
6. When entering provisional records, do not forget to check the **DMV Registration Issue Reported** checkbox if any provisional voter reported to an election official that he or she submitted a voter registration application to the DMV. Do not check this box for any other reason.

<input checked="" type="checkbox"/> DMV Registration Issue Reported
<input type="checkbox"/> ID Provided
Gender ▼

7. We query the DMV database for all provisional records entered into SEIMS. You may download your county's [DMV Provisional Research Report](#) from the intranet. Any provisional record entered by 4:30 p.m. will be queried overnight and a report for the record will be available by the next day.

DMV Provisional Research Report	List of provisional voters who have been sent/returned from the DMV provisional research process. User must select a county, status, and date range.
---	--

8. Please be sure to upload any incident report that your office or one of your voting sites experienced during this election here: [\CountyUploads_SBE\2018\20181106_GeneralIncident Report](#)
9. It is not proper to "retrieve" any ballot results without going through a statutorily sanctioned process. If your board believes that someone was not qualified to cast an absentee ballot, then a challenge to the absentee ballot would have needed to have been challenged yesterday and the board would then hear the challenge on the day of the county canvass. If sustained, only then may a ballot be retrieved.
